

Partitioning two digit numbers.

Note - partitioning means breaking the problem down to simpler parts and working them out.

Partition the following two digit numbers into tens and units. The first two have been done for you.

Answers

1) $25 = 20 + 5$

16) $43 = 40 + 3$

2) $16 = 10 + 6$

17) $52 = 50 + 2$

3) $31 = 30 + 1$

18) $14 = 10 + 4$

4) $11 = 10 + 1$

19) $29 = 20 + 9$

5) $49 = 40 + 9$

20) $55 = 50 + 5$

6) $15 = 10 + 5$

21) $84 = 80 + 4$

7) $76 = 70 + 6$

22) $76 = 70 + 6$

8) $22 = 20 + 2$

23) $33 = 30 + 3$

9) $82 = 80 + 2$

24) $90 = 90 + 0$

10) $37 = 30 + 7$

25) $47 = 40 + 7$

11) $96 = 90 + 6$

26) $17 = 10 + 7$

12) $28 = 20 + 8$

27) $24 = 20 + 4$

13) $12 = 10 + 2$

28) $53 = 50 + 3$

14) $31 = 30 + 1$

29) $68 = 60 + 8$

15) $50 = 50 + 0$

30) $13 = 10 + 3$
