Partitioning two digit numbers.

Note - partitioning means breaking the problem down to simpler parts and working them out.

Partition the following two digit numbers into tens and units. The first two have been done for you.

1) 25 = 20 + 5

2) 16 = 10 + 6

3) 31 = ___ + ___

4) 11 = ___ + ___

5) 49 = ___ + ___

6) 15 = ___ + ___

7) 76 = ___ + ___

8) 22 = ___ + ___

9) 82 = ___ + ___

10) 37 = ___ + ___

11) 96 = ___ + ___

12) 28 = ___ + ___

13) 12 = ___ + ___

14) 31 = ___ + ___

15) 50 = ___ + ___

16) 43 = ___ + ___

17) 52 = ___ + ___

18) 14 = ___ + ___

19) 29 = ___ + ___

20) 55 = ___ + ___

21) 84 = ___ + ___

22) 76 = ___ + ___

23) 33 = ___ + ___

24) 90 = ___ + ___

25) 47 = ___ + ___

26) 17 = ___ + ___

27) 24 = ___ + ___

28) 53 = ___ + ___

29) 68 = ___ + ___

30) 13 = ___ + ___
